Location	:	Vidyaranyapura office, Bangalore.

Job Brief

We are looking for an Android developer responsible for the development and maintenance of applications aimed at a vast number of diverse Android devices. Your primary focus will be the development of Android applications and their integration with back-end services.

Responsibilities

1. Translate designs and wireframes into high quality code
2. Ensure the best possible performance, quality, and responsiveness of the application.
3. Identify and correct bottlenecks and fix bugs.

Job Description

- 5-8 years of experience in Android application development.
- Strong knowledge of Android SDK, different versions of Android, and how to deal with different screen sizes
- Design and build advanced applications for the Android platform.
- Implement communication with hardware sensors and web services.
- Working knowledge of MySQL/ SQLite
- Experienced in video imaging applications or medical applications.
- Exposure to International software development standards.

- Familiarity with RESTful APIs to connect Android applications to back-end services
- Strong knowledge of Android UI design principles, patterns, and best practices
- Basic understanding of API and Back-end services to take care of integrations.
- Working knowledge of JSON, XML & bug fixing
